

**Instructions for return of ITAR controlled product:**

In order to bring these units back in for repair, we will be using an ITAR exemption. It is very important that you note this exemption on all customs documentation. To facilitate the return of the product you will need to perform the following steps. If you have questions about these instructions please contact me so we can discuss and clarify what is being requested prior to return shipment. This authorization is limited to the units referenced above. If additional returns are necessary, please contact Cobham Avionics for Authorization.

**1. The following statement must be referenced on the delivery note (packing list), commercial invoice, waybill, and the outside of the shipping container.**

**"This shipment is being imported in accordance with and under the authority of 22 CFR 123.4(a)(1)"**

**Please also list the following statement on your delivery note and invoice:**

**"These commodities are controlled for export by the U.S. Department of State. They may not be transferred, transshipped on a non-continuous voyage, or otherwise be disposed of outside of the United States, either in their original form or after being incorporated into other end-items, without the prior written approval of the U.S. Department of State."**

2. Please proceed with the packaging of the shipment for return to Cobham Avionics. A delivery note, commercial invoice (required for Customs clearance), and repair purchase order will need to be prepared and sent with the return shipment.
